Product : T150, DMTX

Topic : OCXO option on DMTX board for simulcast application

Date : 7 October , 2005

The OCXO option on version 3 DMTX board is designed for simulcast application. This OCXO will replace the T150's on board reference oscillator. Following modifications need to be done on the T150 PCB if the DMTX board has the OCXO option:

1. Remove R152
2. Remove Q29
3. Remove R143
